TOP LOADING RESISTANCE

60kg (132lbs) at 23°C (73°F), 30 days, product temperature when filling pails and warehouse temperature will affect pail performance. Hofmann recommends testing prior to full production.

OPENING & CLOSING

TO OPEN: Remove tear strip, then lift cover.
TO CLOSE: Place lid on pail, press on with hands or use a rubber mallet.

RECOMMENDATIONS

Do not exceed pallet edges with pails. Grade A pallets should be used with boards that have tight spacing to ensure proper pail support. To improve stability, release air from pail when applying the lid. Stretch wrapping machine tension should be adjusted to ensure no deformation of the pail. Use slip-sheet to improve pails stability. Hofmann recommends testing prior to full production.

Handling conditions vary a lot from customer to customer. Tests are recommended throughout the process of denesting, filling, conveying, palletization, warehousing, transportation and utilization by intermediaries and users.
